

Stockit

Version 1.7.3

Software Update Details

Release Date 12-Nov-2019

Problem Fixes in Version 1.7.3 : 12-Nov-2019

Date Fields

- It was not possible to enter a date beyond the end of 2020.

Parts Lists

- The function to Update Parts Lists Costs could in some situations run very slowly.

Problem Fixes in Version 1.7.0.2 : 02-Nov-2018

Startup

- Application could report "invalid argument" after updating database from earlier version.
- Application could get stuck attempting to re-open parts list that it had failed to open in previous session.

Problem Fixes in Version 1.7.0.1 : 26-Apr-2017

Login

- Cursor and/or buttons could flicker when pressing the OK button on the Login dialog.

Orders

- Place Orders would consolidate pending order items from other database users without making these items visible to the current user.

Recover

- Attempting to recover a locked database could fail with an error "Unable to open registry key".

Reports

- A custom Orders report that worked in the previous version no longer worked in version 1.7.
